Khaled Essmairi

Backend Engineer | API & Distributed Systems Architect

📍 Ariana, Tunisia 📞 +216 46 25 25 37 ✉️ essmairi.khaled@gmail.com 🔗 linkedin.com/in/essmairi-khaled

Profile

Full-Stack Engineer with a strong specialization in backend development (Java/Spring Boot). I design and deploy robust, scalable, and secure architectures, focusing on performance, continuous integration, and code quality. Proven experience in the banking sector and identity management.

Backend Skills

Java (8/11/17) · Java EE / Jakarta EE · Spring Boot / Spring Security · REST / SOAP APIs · Microservices · Hibernate / JPA · SQL (MySQL, Oracle, PostgreSQL) · MongoDB · Docker / Maven / Git · OpenLDAP / Keycloak · Python

Frontend & Tools

Angular / TypeScript · JavaScript / JSP · Bootstrap / HTML5/CSS3 · Linux / Windows Server

Languages

Arabic (Native)

French

English

Certifications

Spring Framework Master Class
Udemy - 2024

Certified SQL, MySQL, PostgreSQL, and MongoDB
Udemy - 2024

Professional Experience

Full-Stack Backend Engineer

June 2024 - Present

Uniq Soft Technology, Tunis-Aouina

- **Backend development of critical modules for the Uniq Financial ERP solution**: designing high-performance REST APIs, optimizing database schemas, and integrating with Temenos Core Banking for ATB, Banque Zitouna, and BH Bank.
- **SQL query optimization**: reduced response times from 1.2s to 180ms on critical processes, significantly improving user experience.
- **Automation of financial and analytical workflows**: implemented automated workflows between Temenos and the ERP module, ensuring seamless integration and reducing manual errors.
- **Implementation of an automated test suite** covering 85% of critical functionalities, ensuring reliability and stability of deliveries.
- **Close collaboration with product teams** for technical specification and implementation of new budgeting and reporting features.

Java EE · Spring Boot · REST APIs · Oracle/MySQL · Docker · JPA/Hibernate

Full-Stack Backend Engineer

August 2023 - June 2024

Vidatos, Sidi Bouzid

- **Design and implementation of high-performance web applications**: developed client portals reducing support requests by 35% thanks to a robust backend architecture.
- **Development of RESTful APIs** with Spring Boot, integrated with relational and non-relational databases for efficient data management.
- **Technical mentoring of junior developers** in adopting best development practices and Agile methodologies (Scrum).
- **Implementation of monitoring and logging solutions** to ensure high service availability.

Java · Spring Boot · JavaScript/PHP · Bootstrap · REST APIs · Git

Graduation Project: SSO IAM

February 2023 - August 2023

Xtensus, Ariana

- **Development of a centralized authentication solution (Single Sign-On)**: integration of OpenLDAP and Keycloak for unified identity and access management.
- **Implementation of OAuth 2.0 and OpenID Connect protocols**, ensuring enhanced security and standard compliance.
- **60% reduction in authentication time** across all integrated applications thanks to an optimized architecture.
- **Design of a Role-Based Access Control (RBAC) system** with granular permissions, improving security and user management.

Spring Boot · Keycloak · OpenLDAP · Angular/TypeScript · OAuth2/OpenID Connect

Notable Backend Projects

E-Commerce Platform

2023

- Developed an API for order, inventory, and payment management using Spring Boot and Oracle, integrating the Stripe API for secure transactions.
- Implemented an analytical dashboard with key performance indicators for administration.

Spring Boot · Oracle · Stripe API · Angular

Task Management API

2022

- Built a RESTful API with Laravel for task management, including JWT authentication, role/permission management, and real-time notifications via WebSockets.
- Complete API documentation using Swagger/OpenAPI.

Laravel · PostgreSQL · JWT · Angular

Education

Master's Degree in Networks and Telecommunications Engineering

2020 – 2023

National Engineering School of Gabès (ENIG)

Preparatory Cycle for Engineering Studies

2018 – 2020

Preparatory Institute for Engineering Studies of Gafsa (IPEIG)
